

Deep Green Product

Marin Clean Energy (MCE) provides two unique energy supply options to its customers. The Deep Green product is 100% renewable energy.

Marin Clean Energy defines renewable energy according to the California State definition of eligible renewables. Types of eligible renewables include solar, wind, biomass, and small hydroelectric facilities under 30 megawatts in size.

MCE's Deep Green rates are expected to come at a premium of approximately 7% above PG&E's rates. For a sample of what this might look like on your PG&E bill, [click here](#).

Product	Renewable Content	Cost
Light Green	25%	At or Below PG&E Cost
Deep Green	100%	7% Premium Over Light Green Cost
PG&E	13%	PG&E Cost
