

Light Green Product

Marin Clean Energy (MCE) provides two unique energy supply options to its customers. The Light Green product is 25% California Certified renewable energy and is expected to increase to 50% renewable energy within 5 years. Types of renewable resources include solar, wind, biomass, small hydroelectric facilities under 30 megawatts in size, and other renewable energy products.

MCE's Light Green rates are competitive with PG&E's rates, which only provide 14% renewable energy.

Product	Renewable Content	Cost
Light Green	25%	Competitive with PG&E Cost
Deep Green	100%	10% Premium Over Light Green Cost
PG&E	14%	PG&E Cost
