

## Rates

Marin Clean Energy (MCE) provides two distinct energy products between which customers may choose. The energy that you purchase from MCE affects only the generation portion of your monthly PG&E bill.

With MCE, you can choose from two separate energy products called **Deep Green** and **Light Green**.

**Deep Green** is 100% renewable and will come at a premium of \$0.01 per kWh for customers in Phase I of MCE.

Many customers who are part of Phase II have contacted MEA inquiring about their ability to begin service under the 100% renewable energy **Deep Green** option in advance of the Phase II rollout of the Marin Clean Energy program.

Early Phase II **Deep Green** Volunteers will pay a cost premium estimated at \$10 per month plus \$0.01 per kWh used. The incremental cost would be higher for customers that use more energy during the month as it would be \$10 plus the amounts shown in the following table:

	Monthly KWH Usage		
	<u>250</u>	<u>500</u>	<u>750</u>
Deep Green Variable Cost Premium	\$2.50	\$5.00	\$7.50

**Light Green** is 25-50% renewable and competitive with PG&E's rates.

The Marin Energy Authority Board of Directors has the ultimate responsibility for setting the electric generation rates for the customers of Marin Clean Energy. The primary objectives of the rate setting plan are to set rates that achieve rate stability, equity among customers in each tariff, customer understanding, and revenue sufficiency.

At the February 4, 2010 Board meeting, the Marin Energy Authority adopted the following rate schedule for Marin Clean Energy customers.
